PROFESSIONAL SUMMARY

Final-year B.Tech student (AI & Data Science, graduating 2026) who builds full-stack web apps end to end — React on the frontend, FastAPI and PostgreSQL on the backend. Most of my recent work has gone into a career-guidance platform where I added a machine learning layer on top of a working full-stack app, so I understand both the app-building side and the ML side, not just one.

TECHNICAL SKILLS

Programming Language: Python, JavaScript

Frontend: React.js, Vite, Tailwind CSS

Backend: FastAPI, REST APIs, JWT Authentication, SQLAlchemy

Mobile: Flutter

Database: PostgreSQL, MySQL, SQLite, SQL, MongoDB, Firebase

AI / ML: ML fundamentals, Generative AI, LLM integration, prompt engineering, AI Agents (OpenAI), Gemini API, Groq API

Automation: n8n (Email, WhatsApp, Google Sheets automation)

Tools: Git, GitHub, VS Code, Postman, Swagger/OpenAPI, Vercel, Render

EDUCATION

Tagore Institute of Engineering and Technology Final Year

B.Tech, Artificial Intelligence and Data Science

PROJECTS

AI Career Mentor — *React • FastAPI • PostgreSQL • Machine Learning*

Live Demo: ai-career-mentor-beta.vercel.app

- Built the full platform myself — React frontend, FastAPI backend, JWT auth and PostgreSQL for storing user and assessment data.
- Added a machine learning model that takes a user's assessment answers and predicts/ranks suitable career paths instead of using a fixed rule-based list.
- Connected the prediction to a dynamic roadmap, an AI career chatbot, and an interview-prep module.

AI Nexus — *React • FastAPI • SQLite • Generative AI*

Live Demo: ai-nexus-lime.vercel.app

- An AI chat app with a React frontend and FastAPI backend that lets users switch between multiple AI models in the same interface.
- Handled auth and chat logic myself and deployed it live — frontend on Vercel, backend on Render.

INTERNSHIPS

EMGLIZT, Salem Artificial Intelligence Intern

- Gained hands-on exposure to core AI concepts and machine learning fundamentals through practical, mentor-guided tasks.
- Applied Python programming skills to explore AI-based approaches to real-world problem solving.

CERTIFICATIONS

- Google Cloud – Data Analytics
- IBM – Big Data Analytics
- Google Cloud – Cybersecurity
- Apex – Frontend Development

IEEE CONFERENCE / RESEARCH

Presented a paper at an IEEE Conference:

"An Autonomous Multi-Agent Software Engineering Framework"
